Thermally Stable Solder Paste No-Clean Sn63/Pb37 T4 (15g Syringe)

Product Highlights

Revolutionary Formula: No Refrigeration Required!
- Low voiding
- Printing speeds up to 125mm/sec
- Long stencil life
- Wide process window
- Clear residue
- Excellent wetting compatibility on most board finishes
- Dispersed grade
- Compatible with enclosed print heads
- REACH Compliant

Specifications
- Alloy: Sn63/Pb37
- Mesh Size: T4
- Micron (µm) Range: 20-38
- Flux Type: Synthetic No-Clean
- Flux Classification: ROL0
- Metal Load: 88% Metal by Weight
- Melting Point: 183°C (361°F)
- Packaging: 5cc/15g Syringe
- Shelf Life: Refrigerated >12 months, Unrefrigerated >12 months

*Shelf Life Notes: Chip Quik® solder paste is good past its quoted shelf life, regardless of refrigeration. Before use, visually inspect the solder paste to ensure it is not dried out or clumpy, or check stencil release. If stored in a jar, stir the product thoroughly for 2-3 minutes before inspection and use.

Chip Quik® solder paste is manufactured using Made in USA high quality synthetic flux and precision atomized metal powder. Chip Quik® solder paste is guaranteed for 12 months from date of manufacture, regardless of refrigeration. If you have any issues with our solder paste, please contact Chip Quik® directly for no charge warranty replacement. Please retain original bill of sale, and solder paste in original container as we may request its return for internal R&D testing purposes.

Printer Operation
- Print Speed: 25-125mm/sec
- Squeegee Pressure: 70-250g/cm of blade
- Under Stencil Wipe: Once every 10-25 prints, or as necessary

Stencil Life
- >12 hours @ 20-50% RH 22-28°C (72-82°F)
- >4 hours @ 50-70% RH 22-28°C (72-82°F)

Stencil Cleaning
- Automated stencil cleaning systems for both stencil and misprinted boards. Manual cleaning using isopropyl alcohol (IPA).

Storage and Handling
- Store at room temperature 20-25°C (68-77°F). Do not freeze. Chip Quik Thermally Stable solder paste should be stored at its operating temperature (room temperature) of 20-25°C (68-77°F), therefore no warming time is required before use.

Transportation
- This product has no shipping restrictions. Shipping below 0°C (32°F) or above 25°C (77°F) for normal transit times by ground or air will not impact this product's stated shelf life.
Recommended Profile
Reflow profile for Sn63/Pb37 solder assembly, designed as a starting point for process optimization.
